

**It took years to
make it a farm...
It takes one call
to keep it safe.**

The soil on your farm or ranch is rich with nutrients and minerals...and underground gas, oil and water pipelines.

Excavations, terracing projects, fence post installation, tiling or subsoiling can create safety hazards due to the depth of the excavations.

CALL BEFORE YOU DIG in order to notify utility companies who may be affected by the excavation. This service is **FREE**.

No one digs more dirt than America's farmers and ranchers. Understanding what is below ground will help you **DIG SAFELY** above ground. **CALL BEFORE YOU DIG!**
